Endangered Species; Permits

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Receipt of an application for modification 7 to scientific research permit 825 (P513).

SUMMARY: Notice is hereby given that the Columbia River Inter-tribal Fish Commission at Portland, OR (CRITFC) has applied in due form for a modification to a permit to take

endangered and threatened species for the purpose of scientific research.

DATES: Written comments or requests for a public hearing on this application must be received on or before August 2, 1996.

ADDRESSES: The application and related documents are available for review in the following offices, by appointment:

Office of Protected Resources, F/PR8, NMFS, 1315 East-West Highway, Silver Spring, MD 20910-3226 (301-713-1401); and

Environmental and Technical Services Division, 525 NE Oregon Street, Suite 500, Portland, OR 97232-4169 (503-230-5400).

Written comments or requests for a public hearing should be submitted to the Chief, Endangered Species Division, Office of Protected Resources.

SUPPLEMENTARY INFORMATION: CRITFC requests a modification to a permit under the authority of section 10 of the Endangered Species Act of 1973 (ESA) (16 U.S.C. 1531-1543) and the NMFS regulations governing ESA-listed fish and wildlife permits (50 CFR parts 217-227).

CRITFC (P513) requests modification 7 to permit 825 for authorization to take juvenile, threatened, Snake River fall chinook salmon (*Oncorhynchus tshawytscha*) annually associated with a study designed to monitor the extent of dissolved nitrogen gas supersaturation effects on outmigrating juvenile anadromous fish in the Snake and Columbia Rivers in the Pacific Northwest. Permit 825 authorizes an annual take of adult and juvenile, threatened, Snake River spring/summer chinook salmon (*Oncorhynchus tshawytscha*) and juvenile, endangered, Snake River sockeye salmon (*Oncorhynchus nerka*) associated with several scientific research studies including the dissolved nitrogen gas supersaturation study. Juvenile fall chinook salmon are proposed to be captured, anesthetized, examined, allowed to recover from the anesthetic, and released. The probability of a juvenile, ESA-listed, Snake River fall chinook salmon indirect mortality associated with the study is negligible. Modification 7 is requested for the duration of the permit. Permit 825 expires on December 31, 1997.

Those individuals requesting a hearing (see **ADDRESSES**) should set out the specific reasons why a hearing on this application would be appropriate. The holding of such hearing is at the discretion of the Assistant Administrator for Fisheries, NOAA. All statements and opinions contained in this application summary are those of
